

Questions for A2

Are my classroom practices/online interactions helping students learn?

Are my preferred teaching methods compatible with the makeup/background/size of my class?

Which teaching methods work best with different teaching opportunities (lectures/tutorials/labs/seminars/online)? How can I adapt my style to these?

Example questions to show how you can structure your case study to evidence reflection on A2.

- What classroom practices (or online interactions) do you use? Which are you choosing to reflect on here?
- What is the desired outcome of this teaching approach?
 - Subject specific or other pedagogy? (V3)
- Why have you used this teaching approach? What was the theoretical basis for choosing it?
 - Discipline norms? Peer advice? (K1, V4)
 - QAA or professional body expectations? (K6)
 - Subject specific or other pedagogy? (V3)
- How effective (in enabling student learning) do you think you have been in using this approach? (K5)
 - Own observations and reflections
 - Evidence from peers
 - Evidence from student feedback
 - Evidence from student achievement
- Based on these observations, what are the strengths and weaknesses of this approach for your context? (A5, K5)
 - Can you support your observations from further reading of the literature?
 - How much does the effectiveness of the method depend on the students?
 - How much does it depend on your performance?
- What have you changed in your practice? Or what do you plan to try?
 - Why have you chosen this change? Practicalities
 - What would be the ideal approach/performance?
 - What literature/theory would support this new approach in this context? (V3)
